## SUMMARY

Senior Python Backend Engineer with 7+ years of experience building SaaS, healthcare, and fintech platforms from first commit to production at 10,000+ users. Core stack: Python (FastAPI, Django), PostgreSQL, React/Next.js, and AWS with Docker and GitHub Actions. Rebuilt a core API on async FastAPI for 60% faster responses and 25% lower server cost, led a monolith-to-microservices migration that cut release cycles from 2 weeks to 3 days, and integrated OpenAI and Claude APIs into production backends through reusable prompt pipelines. Open to remote roles.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript
**Backend:** FastAPI, Django, Flask, REST APIs, Microservices, Celery, JWT, OAuth2, RBAC, Third-Party API Integrations
**Frontend:** React, Next.js
**AI / LLM:** OpenAI API, Claude API, LLM Integration, Prompt Engineering, Prompt Pipelines
**Databases & Caching:** PostgreSQL, MySQL, Redis
**Cloud & DevOps:** AWS (EC2, RDS, S3), Docker, GitHub Actions, CI/CD

## PROFESSIONAL EXPERIENCE

### Senior Full Stack Engineer
January 2025 – Present

*SlySol | Lahore, Punjab, Pakistan*

- Architected and shipped 3 SaaS platforms on FastAPI, Django, React, and Next.js, sustaining 99.9% uptime for 10,000+ active users.
- Integrated OpenAI and Claude APIs into production backends (content generation, automated summaries, AI-assisted workflows) through reusable prompt pipelines.
- Rebuilt the core API layer on async FastAPI, cutting average response time by 60% and server spend by 25%.
- Led the monolith-to-microservices migration, shrinking release cycles from 2 weeks to 3 days.
- Designed a JWT/OAuth2 role-based access system across 5 user roles, closing 3 security vulnerabilities flagged in an audit.
- Containerized all services with Docker and automated CI/CD via GitHub Actions, eliminating ~80% of manual deployment work.

### Full Stack Software Engineer
February 2022 – December 2024

*Code District | Lahore, Punjab, Pakistan*

- Delivered 8+ full-stack applications (Django, Flask, React, PostgreSQL) for healthcare, finance, and logistics clients.
- Engineered a Celery and Redis pipeline processing 500K+ background jobs per day, reducing queue latency by 70%.
- Introduced CI/CD across 3 environments, cutting deployment time from 45 minutes to under 8 (~82% faster).
- Migrated a legacy application to AWS (EC2, RDS, S3), raising availability from 85% to 89% SLA.

### Full Stack Engineer
September 2019 – January 2022

*Devsinc | Lahore, Punjab, Pakistan*

- Built and maintained 5+ eCommerce and SaaS applications (Python, Django, PostgreSQL) serving 20K+ end users.
- Integrated 15+ third-party REST APIs (payments, shipping, analytics) and cut page load time by 40% through query and asset optimization.

## EDUCATION

**Bachelor of Science, Computer Science**
September 2016 – September 2020

*The University of Lahore*
