Ahsan Ali

Senior Python Backend Engineer | FastAPI · Django · PostgreSQL | LLM/OpenAI/Claude API Integration | React & Next.js | AWS, Docker | 7+ Yrs | Open to Remote
Lahore, Punjab, Pakistan

Summary

Most teams don't have a "can we build it" problem. They have a "can we keep it fast, secure, and shippable as it grows" problem. That's the problem I solve.I'm a Senior Python Backend Engineer with 7+ years building SaaS, healthcare, and fintech platforms, from first commit to production at 10,000+ users. My core stack is Python (FastAPI, Django) and PostgreSQL on the backend, React/ Next.js on the frontend, deployed on AWS with Docker and GitHub Actions.What that looks like in practice→ Rebuilt a core API on async FastAPI: 60% faster responses, 25% lower server cost→ Led a monolith-to-microservices migration: release cycles from 2 weeks to 3 days→ Built a Celery + Redis pipeline handling 500K+ background jobs/day→ Shipped 3 SaaS platforms at 99.9% uptimeWhere I'm focused now: production AII wire OpenAI and Claude APIs into real backends for content generation, summarization, and AI-assisted workflows, with reusable prompt pipelines, not one-off demos. I care about the unglamorous parts: latency, cost per request, fallbacks, and not breaking the product you already have.I'm a good fit if you need:• A senior Python/FastAPI engineer who can own backend architecture• Someone to take an MVP to production scale• An engineer to add LLM features to an existing product safelyCore skills: Python, FastAPI, Django, Flask, PostgreSQL, MySQL, React, Next.js, TypeScript, AWS (EC2, RDS, S3), Docker, GitHub Actions, CI/CD, Celery, Redis, REST APIs, Microservices, OpenAI API, Claude API, Prompt Engineering, LLM IntegrationOpen to fully remote roles. Message me here or email ahsanali.dev12@gmail.com

Experience

SlySol

Senior Full Stack Engineer
January 2025 - Present (1 year 10 months)
Lahore, Punjab, Pakistan

- Architected and shipped 3 SaaS platforms on FastAPI, Django, React and Next.js, sustaining 99.9% uptime for 10,000+ active users
- Integrated OpenAI and Claude APIs into production backends (content generation, automated summaries, AI-assisted workflows) through reusable prompt pipelines
- Rebuilt the core API layer on async FastAPI, cutting average response time 60% and server spend 25%
Led the monolith-to-microservices migration, shrinking release cycles from 2 weeks to 3 days
- Designed a JWT/OAuth2 role-based access system across 5 user roles, closing 3 security vulnerabilities flagged in an audit
- Containerized all services with Docker and automated CI/CD via GitHub Actions, eliminating ~80% of manual deployment work

Code District
Full Stack Software Engineer
February 2022 - December 2024 (2 years 11 months)
Lahore, Punjab, Pakistan

- Delivered 8+ full-stack applications (Django, Flask, React, PostgreSQL) for healthcare, finance and logistics clients
- Engineered a Celery + Redis pipeline processing 500K+ background jobs/day, reducing queue latency by 70%
- Introduced CI/CD across 3 environments, cutting deployment time from 45 minutes to under 8 (~82% faster)
- Migrated a legacy application to AWS (EC2, RDS, S3), raising availability from 85% to 89% SLA

Devsinc
Full Stack Engineer
September 2019 - January 2022 (2 years 5 months)
Lahore, Punjab, Pakistan

- Built and maintained 5+ eCommerce and SaaS applications (Python, Django, PostgresSQL) serving 20K+ end users
- Integrated 15+ third-party REST APIs (payments, shipping, analytics) and cut page load time 40% through query and asset optimization

---

Education

The University of Lahore
Bachelor of Science, Computer Science · (September 2016 - September 2020)
