SUMMARY

Senior Full-Stack Engineer with 7+ years of experience building backend-heavy web platforms and production AI features. Delivered full-stack products with Node.js, NestJS, TypeScript, React, Next.js, Django, and FastAPI across 20 client projects serving 10,000 users. Built REST and GraphQL APIs, LLM-powered document extraction (LangChain, RAG, OpenAI, Ollama, OCR) processing 20,000 documents per month, and AWS, Docker, Terraform CI/CD pipelines that cut deployment time by 75%. Open to remote Senior and Staff-track engineering roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend: Node.js, NestJS, Django, FastAPI, REST APIs, GraphQL, Celery, JWT Authentication, RBAC, Third-Party API Integrations

Frontend: React, Next.js, Redux, Material UI

AI / LLM: LLM Integration, RAG, LangChain, OpenAI, Ollama, OCR, AI Agents

Databases: PostgreSQL, Django ORM

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD, ELK Stack

Other: Stripe, Data Pipelines, Background Job Processing, Full-Stack Development

PROFESSIONAL EXPERIENCE

Senior Full Stack AI Engineer

April 2023 – Present

SlySol | Lahore, Punjab, Pakistan

- Shipped LLM-powered document extraction using LangChain, RAG, OpenAI, Ollama, and OCR, processing 20,000 documents per month at 77% extraction accuracy.
- Led end-to-end delivery of full-stack products in TypeScript, React, Django, and FastAPI, serving 10,000 users across 20 client projects.
- Automated data pipelines across 80+ external sources using Celery (extraction, validation, transformation), cutting manual processing by 70%.
- Architected REST and GraphQL APIs with role-based access control powering dashboards and complex workflows, handling 10,000+ requests per day at 300 ms p95 latency.
- Reduced deployment time from 2 hours to 30 minutes (75%) by containerizing services and implementing Docker, Terraform, and CI/CD on AWS.
- Partnered with frontend, backend, and data teams to improve reliability and performance, reducing incident rate and downtime by 70%.

Software Engineer

October 2021 – March 2023

Programmer Force | Lahore, Punjab, Pakistan

- Designed a modular ERP suite (Inventory, HR, Finance, CRM) adopted by 120 users across 30 teams.
- Cut API response times by 70% by moving heavy workflows to Celery background jobs.
- Optimized PostgreSQL schemas and queries for high-volume operations, reducing query time from 1 s to 200 ms.
- Built secure REST APIs with JWT, RBAC, validation, and third-party integrations.
- Integrated Stripe to automate payments and billing workflows.
- Reduced issue-resolution time by 40% by implementing centralized logging with the ELK Stack.

Full Stack Developer

August 2019 – September 2021

Nextbridge Ltd. | Lahore, Punjab, Pakistan

- Engineered real-time ticket booking and availability workflows supporting 4,000 concurrent users with transactional integrity (zero double-bookings).
- Built organizer dashboards (schedules, pricing, registrations, sales analytics) in React, Redux, and Material UI.
- Developed Node.js and Django REST APIs for user management, events, and ticketing, with JWT authentication and secure session handling.
- Designed PostgreSQL schemas and optimized complex Django ORM queries.

EDUCATION

Bachelor of Science, Computer Science

February 2016 – March 2020

University of Central Punjab (UCP)
