SUMMARY

Senior Frontend Engineer with 4+ years of experience building the user-facing side of AI and healthcare products. Built a streaming UI rendering live LLM output with zero layout shift for a podcast summarization platform (1,000+ users), patient and provider portals for a healthcare replatform (55% MoM growth, 40% faster case processing), and the frontend of an enterprise data platform pulling from 150+ sources. Promoted to Senior within 12 months. Open to remote senior frontend and full-stack roles.

TECHNICAL SKILLS

Languages: TypeScript, Python

Frontend: React, Next.js, Redux, Tailwind CSS, Material UI, Chakra UI, Responsive Design, Component Libraries, Figma-to-Code

APIs & Real-Time: GraphQL, REST APIs, WebSockets, LLM Streaming

Backend & Data: Node.js, NestJS, FastAPI, JWT Authentication, PostgreSQL

AI / LLM: OpenAI API, Claude API, Streaming UIs, Machine Learning

Other: Frontend Architecture, Code Review, Data Structures; Languages: English (Full Professional), Urdu (Native or Bilingual)

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer
July 2025 – Present

SlySol | Lahore, Punjab, Pakistan

- Led frontend delivery on AI and healthcare client products, setting architecture, component patterns, and code-review standards across multiple concurrent projects.
- Engineered the streaming UI for an AI podcast summarization platform (1,000+ users, 5,000+ episodes), rendering live LLM output with zero layout shift or dropped tokens and cutting load time by 40%.
- Built patient and provider portals with real-time case tracking and integrated billing for a healthcare replatform, contributing to 55% MoM growth and a 40% reduction in case-processing time.
- Designed an AI document-intake flow that converts uploaded forms, scans, and reports into structured records.

Associate Software Engineer
August 2024 – July 2025

SlySol | Lahore, Punjab, Pakistan

- Owned the frontend of an enterprise data platform, building dashboards across 150+ data sources.
- Delivered multi-tenant dashboards for a donor-management ERP serving 20 organizations, with role-based views and GraphQL-powered tables handling 100,000+ records.
- Introduced Redux state patterns that standardized data flow across modules and reduced cross-module bugs.
- Converted Figma designs into responsive, cross-browser production interfaces and improved module performance.

Frontend Web Developer
June 2023 – May 2024

SolutionSurface | Lahore, Punjab, Pakistan

- Shipped 5 client web applications in React, TypeScript, and Redux, from API integration through release.
- Built a reusable UI component library adopted across 5 projects, accelerating feature delivery by up to 40%.

Frontend Developer
March 2022 – February 2023

Surfiq Technologies | Lahore, Punjab, Pakistan

- Shipped 3 client and internal web applications in React, Next.js, and TypeScript.
- Built responsive, reusable UI with Material UI, Chakra UI, and Tailwind CSS, integrating REST APIs for data-driven workflows.

PROJECTS

- Multi-Model AI Chat Platform: built the FastAPI backend (JWT auth, REST/WebSocket streaming, model catalog, token quotas).

CERTIFICATIONS

Certified React18 Developer

EDUCATION

Bachelor's degree, Computer Science
October 2018 – October 2022

National College of Business Administration & Economics
