Certified React18 Developer

Umer Riaz

Senior Frontend Engineer | React, Next.js, TypeScript | AI/LLM Streaming UIs & Healthcare SaaS | Full-Stack (Node.js, FastAPI) | Remote

Lahore, Punjab, Pakistan

Summary

I build the part of AI and healthcare products that users actually touch, and I make sure it holds up when the data gets messy, fast, or huge.Over the past four years, that's meant streaming LLM output into a podcast summarization platform (1,000+ users, 5,000+ episodes processed) without layout shift or dropped tokens, building patient and provider portals for a healthcare replatform that helped drive 55% month-over-month growth and cut case-processing time by 40%, and owning the frontend of an enterprise data platform that pulls from 150+ sources.I started as an associate engineer at SlySol and was promoted to Senior Frontend Engineer within 12 months. These days I set frontend architecture and code-review standards across client projects, turn Figma files into production-grade component systems, and use AI coding tools daily to ship faster without cutting corners.I'm also comfortable beyond the browser. I built the FastAPI backend for a multi-model AI chat platform, including JWT auth, streaming over REST and WebSockets, an admin-managed model catalog, and per-user token quotas. My CS degree with a machine learning specialization means I understand the systems behind the UI I'm building.What I work with: React · Next.js · TypeScript · Redux · Tailwind CSS · Material UI · GraphQL · REST · WebSockets · Node.js/NestJS · Python/FastAPI · PostgreSQL · OpenAI & Claude APIsLooking for: remote senior frontend or full-stack roles with product teams building AI, healthcare, or data-heavy SaaS. Based in Lahore (GMT+5) with strong overlap for UK, EU, and Gulf hours. Message me here or email umerriaz4774@gmail.com | Portfolio: umer-riaz.vercel.app

Experience

SlySol
2 years 3 months

Senior Frontend Engineer

July 2025 - Present (1 year 4 months)
Lahore, Punjab, Pakistan

- Led frontend delivery on AI and healthcare client products, setting architecture, component patterns, and code-review standards across multiple concurrent projects.
- Built patient and provider portals with real-time case tracking and integrated billing for a healthcare replatform, contributing to 55% MoM growth and a 40% reduction in case-processing time.
- Engineered the streaming UI for an AI podcast summarization platform (1,000+ users, 5,000+ episodes), rendering live LLM output with zero layout shift or dropped tokens and cutting load time by 40%.
- Designed an AI document-intake flow that converts uploaded forms, scans, and reports into structured, reviewable records.

Associate Software Engineer
August 2024 - July 2025 (1 year)
Lahore, Punjab, Pakistan

- Owned the end-to-end frontend of an enterprise data infrastructure platform, from component architecture to final UI, building dashboards and visualizations across 150+ data sources.
- Delivered multi-tenant dashboards for a donor-management ERP serving 20 organizations, with role-based views and GraphQL-powered tables handling 100,000+ records.
- Introduced Redux state patterns that standardized data flow across modules and reduced cross-module bugs.
- Converted Figma designs into responsive, cross-browser production interfaces and improved performance across modules.
- Earned promotion to Senior within 12 months.

SolutionSurface
Frontend Web Developer
June 2023 - May 2024 (1 year)
Lahore, Punjab, Pakistan

- Shipped 5 client web applications in React, TypeScript, and Redux, owning delivery from API integration through testing and release.
- Built a reusable UI component library adopted across 5 projects, accelerating feature delivery by up to 40%.
- Partnered with designers and backend engineers to ship production features through testing and debugging cycles.

Surfiq Technologies

Frontend Developer

March 2022 - February 2023 (1 year)

Lahore, Punjab, Pakistan

- Shipped 3 client and internal web applications in React, Next.js, and TypeScript.
- Built responsive, reusable UI with Material UI, Chakra UI, and Tailwind CSS, integrating REST APIs for data-driven workflows.
- Resolved UI defects with cross-functional teams.

Education

National College Of Business Administration & Economics

Bachelor's degree, Computer Science · (October 2018 - October 2022)
